(54) Title: DISC BRAKE SEAL ASSEMBLY

## (57) Abstract

A seal device for use in sealing between parts of a thrust assembly of a disc brake has a support element (31) adapted to be carried by a first part (25) of the thrust assembly, the support element (31) carrying a seal (33) arranged so that, with the support element (31) in its position of use on the first part (25), the seal (33) engages a surface of a second part (25) of the thrust assembly in sealing relationship. Also disclosed is a thrust assembly for a disc brake and a disc brake incorporating such an assembly.
